Infoshield **the Awareness Solution**

Infoshield an integrated E-learning Management System that educates users about the growing risks of information security and provides them with security countermeasures to respond accordingly.

Infoshield is a comprehensive solution designed and developed to fulfill all requirements for cybersecurity awareness and training. It consists of a Learning Management System (LMS) developed by Innovative Solutions in response to the ever-increasing number and severity of attacks targeting and breaches caused by employees.

The solution aims at structurally spreading essential knowledge about cybersecurity and associated risks in addition to providing extensive information and proper course of actions when targeted by cyber threats.

Quizzes and Interactive Content

Workplace Security

Infoshield
Objectives

→ **Promoting security awareness** and knowledge within an organization efficiently.

→ **Educating employees** about expected behavior and responsibilities for safeguarding information.

→ **Increasing effectiveness of security awareness** by providing interactive content.

→ **Targeting different levels within an organization** with a variety of security topics.

→ **Minimizing human errors** by disseminating best security practices.

→ **Strengthening the human link** in the information security chain at any organization.

→ **Providing up-to-date security awareness modules** that tackle most security risks.

Infoshield **Features and Benefits**

Bilingual Support

full support for Arabic and English languages for user interface and security content.

User Integration

It's easy to integrate Infoshield with active directory to synchronize user account in addition to manual integration.

Deployment

Infoshield can be easily deployed as-a-service or on premise to meet any particular legal or regulatory requirements.

Branding

co-branding or sole branding can be provided with organization corporate identity.

Tracking and Reporting

a wealth of reports and dashboards are available with detailed key performance indicators and maturity levels.

Customization

security content can be customized according to organization's needs.

Testing

quizzes are associated with modules to test the employees' knowledge.

On Demand - Modules

topics can be customized or developed based on needs and business objectives.

Infoshield **Awareness Modules**

The modules are logically structured to present a variety of topics. Each module is fully animated and the content can be viewed sequentially. In addition to that, each module is associated with an illustrated video and a quiz. The modules are delivered through an integrated and interactive learning management system to assure delivering the learning process effectively
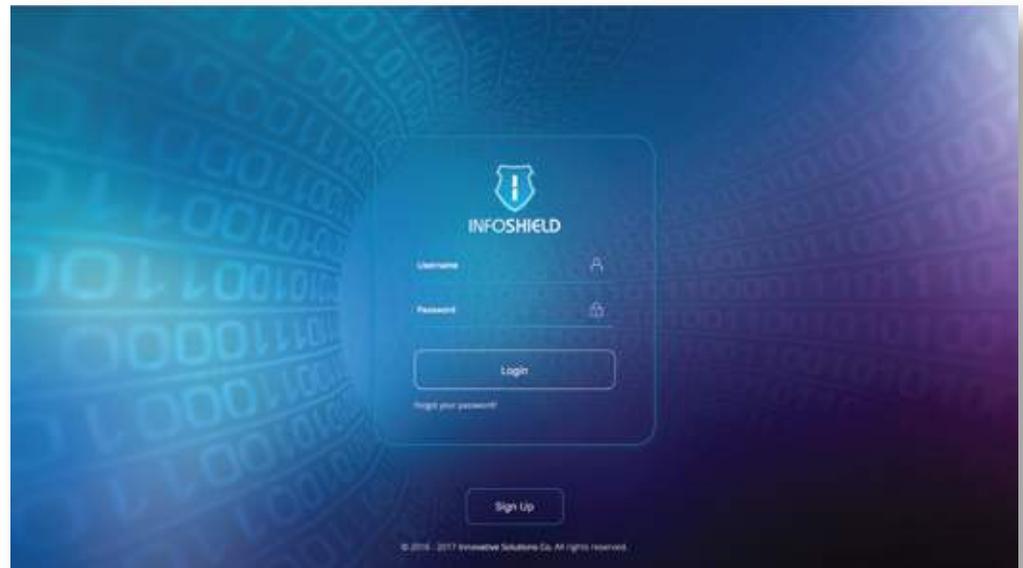

Infoshield **Awareness Modules**

Introduction to Information Security

This module provides users with an overview of information security, and defines the basic information security terminology. Also, it highlights the most significant threats to information security
